

matrix_mul_512x512

Additional Statistics:

	Lower bound	Estimate	Upper bound
R ²	0.0002712	0.0002804	0.0002689
Mean	14.313 ms	14.403 ms	14.505 ms
Std. Dev.	350.53 μs	493.93 μs	615.11 μs
Median	14.172 ms	14.197 ms	14.304 ms
MAD	134.08 μs	210.73 μs	277.51 μs

Additional Plots:

- Typical
- Mean
- Std. Dev.
- Median
- MAD

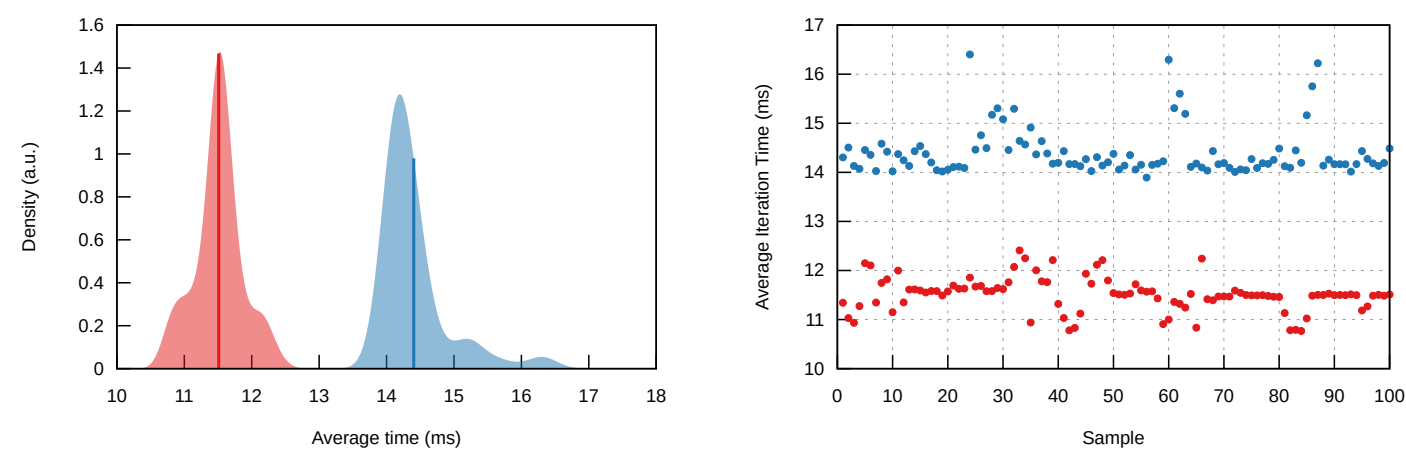

Understanding this report:

The plot on the left displays the average time per iteration for this benchmark. The shaded region shows the estimated probability of an iteration taking a certain amount of time, while the line shows the mean. Click on the plot for a larger view showing the outliers.

The plot on the right shows the average time per iteration for the samples. Each point represents one sample.

See [the documentation](#) for more details on the additional statistics.

Change Since Previous Benchmark

Additional Statistics:

	Lower bound	Estimate	Upper bound	
Change in time	+24.014%	+25.127%	+26.243%	(p = 0.00 < 0.05)
Performance has regressed.				

Additional Plots:

- Change in mean
- Change in median
- T-Test

Understanding this report:

The plot on the left shows the probability of the function taking a certain amount of time. The red curve represents the saved measurements from the last time this benchmark was run, while the blue curve shows the measurements from this run. The lines represent the mean time per iteration. Click on the plot for a larger view.

The plot on the right shows the iteration times for the two measurements. Again, the red dots represent the previous measurement while the blue dots show the current measurement.

See [the documentation](#) for more details on the additional statistics.

This report was generated by Criterion.rs, a statistics-driven benchmarking library in Rust.
